

JOÃO ALMEIDA

System Administrator | Network & Infrastructure | Defensive Security

912 162 416 | j.joao.almeida06@gmail.com | linkedin.com/in/joao-almeida-it | Vale de Cambra, Aveiro, Portugal

PROFESSIONAL SUMMARY

Systems Administrator with hands-on experience across virtualized infrastructure, networking, security, and enterprise support/ERP environments (SQL Server, PHC). During curricular internship at Simoldes Tools, independently built a full enterprise lab environment on Hyper-V — including Active Directory, DNS, DHCP, File Server, Zabbix/Grafana monitoring, and a Wazuh SIEM aligned with NIST CSF 2.0. Also gained field-support experience at BaseTx Consulting, working with SQL Server, enterprise firewalls (Endian, IPFire, WatchGuard), network segmentation and VPN configuration. Proficient in Windows Server, Linux (Ubuntu/Debian), security hardening, GPO management, and infrastructure automation. Seeking a technical role in System Administration, Network Engineering, or Defensive Security / SOC.

PROFESSIONAL EXPERIENCE

Technician of Systems — BaseTx Consulting August 2026 · 1 month

Gandra, Paredes, Portugal — Systems & Cybersecurity Department

- Onboarding and integration into the Systems and Cybersecurity team, with focus on Microsoft infrastructures.
- Hands-on practice with SQL Server in a test environment, including user creation and permission configuration.
- Configuration and administration of enterprise firewalls: Endian, IPFire, and WatchGuard.
- Fundamentals of network segmentation (LAN / DMZ / Guests) and VPN configuration.
- Use of monitoring tools (Zabbix) and network diagnostic commands (ping, tracer, nslookup).
- Accompanied an on-site technical visit to a client, in the context of PHC (ERP) infrastructure support.

Waiter — Café do Parque — Vale Mágico July 2026 · 1 month

Vale de Cambra, Aveiro, Portugal — Part-time

- Customer service and order management in a fast-paced environment.
- Direct communication with customers, resolving unexpected situations on the spot.
- Teamwork and priority management during peak periods.
- Coordination of the floor team, including task distribution and priority management.

System Administrator — Intern — Simoldes Tools (Simoldes Group) February 2026 – June 2026 · 5 months

Oliveira de Azeméis, Portugal — Industrial Manufacturing

- 680 hours curricular internship.
- Independently designed and deployed a full corporate virtualized infrastructure on Hyper-V, covering Active Directory with hierarchical OU structure, DNS, DHCP, and File Server with role-based access control.
- Implemented and configured Wazuh SIEM in a production-aligned environment, with agents on Windows and Linux servers.
- Integrated external sources into Wazuh: VirusTotal, Office 365, FortiGate, Docker, and CrowdStrike.
- Developed OpenSearch dashboards for vulnerability monitoring, SCA, MITRE ATT&CK, Office 365, and FortiGate.
- Hardened and optimized Wazuh Manager configuration in alignment with the NIS2 framework.
- Administered virtualized infrastructure with Hyper-V in a production environment.
- Managed and maintained Windows and Linux servers in an industrial production environment.
- Configured and maintained industrial machine monitoring systems with MachineMetrics, on Raspberry Pi and Windows.
- Performed network infrastructure inventory and reconciliation with Zabbix mapping.
- Managed IT assets with GLPI, including equipment inventory.
- Provided helpdesk support and operational assistance to Simoldes Group users.
- Configured network segmentation between lab VLANs, with NAT and firewall rule management.
- Managed Group Policy Objects (GPOs) for security hardening across the domain — password policies, audit policies, software restriction, and workstation lockdown.

Technician of Field — Prevalta – Fire & Security Systems June – July 2024 · 2 months

Vale de Cambra, Aveiro, Portugal — Internship

- 210 hours internship.
- Installation and configuration of IP video surveillance (CCTV) systems.
- Configuration of network equipment.
- Structured cabling and on-site equipment assembly.
- Testing and diagnostics of electronic security systems in industrial and commercial facilities.

- Direct technical contact with clients for validation of installed systems.

Technician of Field — Prevalta – Fire & Security Systems *June – July 2023 · 2 months*

Internship — On-site

- 210 hours internship.
- Installation and configuration of IP video surveillance (CCTV) systems.
- Configuration of network equipment and structured cabling.
- Testing and diagnostics of electronic security systems in industrial and commercial facilities.
- Direct technical contact with clients for validation of installed systems.

Waiter — Café do Parque — Vale Mágico *April 2025 – September 2025 · 6 months*

Vale de Cambra, Aveiro, Portugal — Part-time

- Customer service and order management in a fast-paced environment.
- Direct communication with customers, resolving unexpected situations on the spot.
- Teamwork and priority management during peak periods.
- Coordination of the floor team, including task distribution and priority management.

IT Support — Intern — Municipality of Vale de Cambra *May – July 2022 · 3 months*

Vale de Cambra, Portugal — Municipal Archive

- 210 hours internship.
- On-site IT support for municipal staff — hardware maintenance, system configuration, and user assistance.
- Digitisation and cataloguing of institutional municipal documents.
- Management of office equipment and digital archive organisation.
- Support for the modernisation of internal administrative processes.

TECHNICAL SKILLS

Virtualization & Infrastructure: Hyper-V, Active Directory, DNS, DHCP, File Server, GPO, VLANs, NAT

Operating Systems: Windows Server 2019/2022, Linux Ubuntu, Linux Debian, Windows 10/11

Databases & ERP: SQL Server (SSMS, users & permissions), PHC

Firewalls & Network Security: Endian, IPFire, WatchGuard, VPN (IKEv2), Network Segmentation (LAN/DMZ/Guests)

Monitoring & SIEM: Zabbix, Grafana, Wazuh, Filebeat, Wazuh Indexer, OpenSearch, Log Analysis

Security & Compliance: NIST CSF 2.0, NIS2, SCA, FIM, Vulnerability Detection, Security Hardening, Threat Detection

Networking: TCP/IP, Switching, Routing, Firewall, Subnetting, CCTV, Structured Cabling, Cisco Packet Tracer, GNS3, ping/tracert/nslookup

IT Asset & Service Management: GLPI, MachineMetrics

Scripting & Automation: Python, Shell Script (Bash), Docker

Other Tools: Incident Management, Helpdesk Support, Technical Documentation

EDUCATION

Escola Superior de Tecnologia e Gestão de Águeda (ESTGA) — Universidade de Aveiro

CTeSP — Redes e Sistemas Informáticos | 2024 – 2026

- Level 5 higher technical program (equivalent to HND) in Network and Computer Systems.
- Core modules: Network Infrastructure, Virtualisation, Linux Administration, Security, Scripting & Automation.

Escola Básica e Secundária de Búzio

Técnico de Informática – Instalação e Gestão de Redes | 2021 – 2024

- Level 4 vocational qualification in IT — Network Installation and Management.

LANGUAGES

Portuguese: Native

English: Working proficiency (B1)

KEY PROJECTS

Enterprise Virtualized Lab – Simoldes Tools Internship

- End-to-end deployment of a corporate infrastructure simulation: Hyper-V hypervisor, Active Directory domain with OUs and GPOs, DNS/DHCP, File Server with RBAC, Zabbix + Grafana monitoring, and Wazuh SIEM (agents, Filebeat, Indexer).
- Security controls aligned to NIST CSF 2.0 and NIS2: SCA benchmarks, FIM on critical paths, vulnerability scanning and remediation tracking.
- Fully self-directed, documented, and operational — not a classroom exercise.
